

Other ideas:

- Monitor your energy use year-on-year using the **Energy Footprint Tool** (via Parish Returns)
- Look at your PCC bank account and investments & check they're **ethically invested**

We need to replace fossil fuel heating systems with renewable alternatives. Prepare by improving your energy efficiency, ensuring sufficient electricity supply, and building up some reserves.

Make a 5-year plan to implement the key recommendations, and get it agreed by the PCC/DCC

Support others to do the same

Create a benefice/deanery Eco Champion group to share ideas.
Engage wider community in campaign action
Support environmental charities

Plan ahead for your next heating system

We need to replace fossil fuel heating systems with renewable alternatives. Prepare by improving your energy efficiency, ensuring sufficient electricity supply, and building up some reserves.

Work towards an(other) Eco Church award

An excellent tool to keep creation care on the agenda, and embraced by the wider congregation/s

Book an energy audit OR do your own using the Net Zero Carbon Church checklist

Make a 5-year plan to implement the key recommendations, and get it agreed by the PCC/DCC

Switch to 100% renewable energy contract for electricity and gas

This is the most effective thing you can do to reduce your carbon footprint.
